### **DETAILED ACTION**

1. The indicated allowability of claims 4 is withdrawn in view of the newly discovered reference(s) to Lebevre et al. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 19-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over McKay et al. McKay et al discloses the claimed invention except for the teaching of a clip, or Velcro means for holding a audio assembly. McKay teaches first 13 and second sections 2 which is capable of storing items (electronic etc) . Yaskai et al teaches that it is advantageous to use a clip or Velcro means for efficiently and effectively holding a cell phone. It would have been obvious to one skilled in the art at the time the invention was made to use the Velcro and clip means of Yaski to hold the cell phone of McKay in order to efficiently and effectively hold the cell phone of McKay as taught by Yaski.

**Allowable Subject Matter**

Claims 1-2, 4-18 and 23 are allowed.

4. Reasons for allowance: None of the prior art of record alone or in combination teaches or fairly suggest the claimed details of independent claim 1 further including "means for mounting the assembly to the hat material comprising dimensions defined by said first section and said second section that facilitate sandwiching the hat material between a portion of said first section and said second section when said first and second sections are joined together." nor does the prior art teach or fairly suggest the claimed details of claim 23 further including "means for mounting the assembly to the hat material, said mounting means comprises magnet secured to said first and second sections."

***Response to Arguments***

5. Applicant's arguments with respect to claims 19-22 have been considered but are moot in view of the new ground(s) of rejection.
